Interlibrary loan life-cycle management system

fILL-osophy

For the last decade, Manitoba public libraries have been using a PLSB-developed resource discovery tool ("Maplin") to find Interlibrary Loan sources within the Manitoba public library community.

PLSB has developed the next evolution of Maplin - fILL - which incorporates full ILL life cycle management, following the structure set out in ISO 10161 (Interlibrary Loan Application Protocol Specification).

Our vision is smoother workflows, better statistics, reduced work load for the libraries, and an Interlibrary Loan system more responsive to the needs of our ultimate clients, the patrons.

fILL means...

Fast

fILL takes advantage of advances in z39.50 search technology to deliver search results in seconds.

Most actions can be completed with a simple mouse click or two.

Freedom

fILL frees you from printing requests, paper files, and overwhelming emails.

You can copy data out of the system at any point, if that suits your workflows.

Facts

fILL gives you access to timely reports and statistics far beyond the traditional "requests made" and "loans sent"

The fact is that you are already managing the ILL life-cycle, whether that's through email folders, printing and filing, custom spreadsheets, or something completely different.

We want to make this as easy as possible for all of the public libraries in Manitoba.

Simple. Powerful. Adaptable.

This is your Interlibrary Loan Management System.
